Data Science Project

Project: Analyzing the trends of COVID-19 with Python

Problem Statement:

Given data about COVID 19 patients, write code to visualize the impact and analyze the trend of rate of infection and recovery rate.

Dataset: CSV and Excel files containing data about Number of COVID 19 Confirmed, Deaths and Recovered patients both around the World and in India. [Download Link](#)

Guidelines:

- Use pandas to accumulate data from multiple data files
- Use plotly (visualization library) to create interactive visualizations and analyze trend in the data.
